What this standard covers

This standard specifies the terms and definitions, structure, model, basic parameters, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage of quantitative disc feeding devices. This standard applies to quantitative disc feeding devices that continuously and evenly quantitatively supply non-sticky bulk materials such as block, granular, non-self-flowing powder from containers such as silos and funnels to belt conveyors.

Document data

International classification (ICS): 77.180.

Chinese classification (CCS): H95.

Estimated length of the Chinese original: 15,116 words.
