What this standard covers

This standard specifies the classification and marking, ordering content, size, shape and weight, technical requirements, test methods, inspection rules, packaging, marking, quality certificate, quality assurance period, transportation, safety, use and maintenance of carbon steel strands for optical cable reinforcement. This standard applies to galvanized, zinc alloy and phosphated steel strands produced from carbon steel for similar purposes such as optical cable reinforcement cores and self-supporting optical cable suspension wires.

Document data

International classification (ICS): 77.140.65.

Chinese classification (CCS): H49.

Estimated length of the Chinese original: 16,129 words.
