What this standard covers

This standard specifies the method for testing the weight, thickness and composition of copper-plated (tin bronze, brass) steel wire coatings (gravimetric method, spectrophotometry, X-ray fluorescence spectrometry, chemical capacity method, atomic absorption spectrometry and inductive coupling plasma) The principle of bulk atomic emission spectroscopy, samples, reagents, test equipment, test procedures and calculation of test results.

Document data

Chinese classification (CCS): H25.

Estimated length of the Chinese original: 15,166 words.

Supersedes the earlier edition YB/T 135-1998.
