What this standard covers

This standard specifies the terms and definitions, classifications, grades, technical requirements, test methods, quality assessment procedures, packaging, marking, transportation, storage and quality certificates of Al₂O₃-SiC-C refractory materials used as linings for molten iron pretreatment. This standard applies to Al₂O₃-SiC-C refractory materials used for working linings of molten iron transportation and pretreatment equipment such as torpedo-type mixed iron cars and ladles (tanks).

Document data

International classification (ICS): 81.080.

Chinese classification (CCS): Q44.

Estimated length of the Chinese original: 7,746 words.

Supersedes the earlier edition YB/T 164-2009.
