What this standard covers

This standard specifies the Nickel Reduction Capacity Determination of total sulfur content in naphthalene test principle, reagents, instruments, test procedures, the results calculated with precision. This standard applies to refined Naphthalene Naphthalene and press the total sulfur content. This method is directly applicable to total sulfur content of 30 ~ 10000mg/kg samples. Total sulfur content higher dilution method available when measuring.

Document data

International classification (ICS): 71.080.01.

Chinese classification (CCS): G18.

Estimated length of the Chinese original: 8,877 words.

Supersedes the earlier edition YB/T 4021-1991.
