What this standard covers

This standard specifies the terms and definitions, grades, technical requirements, test methods, quality assessment procedures, packaging, marking, transportation, storage and quality certificates of blast furnace tap trough castables. This standard applies to the working layer refractory castables (including prefabricated parts) in the blast furnace main trench, iron trench, slag trench, swing chute and other parts, as well as spray coatings for thermal repair.

Document data

Chinese classification (CCS): Q46.

Estimated length of the Chinese original: 6,651 words.

Supersedes the earlier edition YB/T 4126-2012.
