What this standard covers

This standard specifies the hot- dip galvanized steel strip production line furnace heat balance determination and calculation of the benchmark, measuring conditions, determination of the project and methods of computation. This standard applies to hot-dip galvanized steel strip production line in gas and electricity to supply energy furnace heat balance determination and calculation, strip continuous annealing furnace production line can refer to execution.

Document data

International classification (ICS): 77.140.50.

Chinese classification (CCS): H46.

Estimated length of the Chinese original: 13,139 words.
