What this standard covers

This standard specifies the inductively coupled plasma atomic emission spectrometry determination of lead and cadmium content. This standard applies to hot- dip galvanized (aluminum and zinc) steel coating of lead and cadmium content, determination range of 5. 0µg/g ~ 1000µg/g.

Document data

International classification (ICS): 77.080.01.

Chinese classification (CCS): H11.

Estimated length of the Chinese original: 7,783 words.
