1 Foreword

YB/T 4287-2012 is issued by Ministry of Industry and Information Technology.

The YB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 10 pages in English translation.

2 Scope Preview

This standard specifies the metal sheet and strip Drawbead resistance test methods and definitions of terminology, symbols, testing theory, test equipment, specimens, test procedures and test reports.

YB/T 4287-2012 falls under ICS 77.040.10, in the field of metallurgy.

This catalogue holds 971 other YB/T standards in that field.

In this catalogue, YB/T standards carry edition years from 1980 to 2026.

3 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document.

GB/T 1804-2000 - General tolerances - Tolerances for linear and angular dimensions

without individual tolerance indications

GB/T 16825.1

4 About this standard

Issued by: Ministry of Industry and Information Technology

English translation: about 10 pages (approximate)

5 Related standards

Standards on related subjects:

GB/T 4337-2025 - Metallic materials - Fatigue testing - Rotating bar bending method

GB/T 4340.1-2024 - Metallic materials - Vickers hardness test - Part 1: Test method

GB/T 4161-2007 - Metallic materials -- Determination of plane-strain fracture toughness

YB/T 4288-2012 - Steel wire ropes for elevators. Bending fatigue testing

YB/T 4286-2012 - Metallic material. Sheet and strip. Testing method for coefficient of friction

YB/T 4285-2012 - Using a portable metal hardness test indentation hardness test methods

6 Classification and status

International classification (ICS): 77.040.10

Chinese Standard Classification (CCS): H 22

Prefix YB/T: recommended standard.
