What this standard covers

This standard specifies the terms and definitions, grades, technical requirements, test methods, quality assessment procedures, packaging, marking, transportation, storage, and quality certificates for carbonaceous ramming mixes used in blast furnace construction. This standard applies to carbonaceous ramming mixes used in blast furnace construction for filling gaps in the blast furnace bottom leveling layer, the ramming layer above (below) the center line of water-cooled pipes, and between carbon bricks and cooling equipment. Corresponding parts of other equipment can refer to this standard.

Document data

International classification (ICS): 81, 81.080.

Chinese classification (CCS): Q40.

Estimated length of the Chinese original: 6,656 words.

Supersedes the earlier edition YB/T 4319-2012.
