### What this standard covers

This standard specifies the test principle, test equipment, sample requirements, sample size measurement, original gauge length marking, test procedures, test result processing and test reports for room temperature tensile tests of metal foils. This standard is applicable to the determination of tensile properties of metal foils with a thickness of no more than 0.2 mm at room temperature.

### Document data

International classification (ICS): 77.040.10.

Chinese classification (CCS): H22.

Estimated length of the Chinese original: 14,132 words.
