What this standard covers

This standard specifies the determination of phosphorus content in ferroaluminum, ferroaluminum manganese and ferrosilicon aluminum manganese using the bismuth phosphorus molybdenum blue spectrophotometric method. This standard is applicable to the determination of phosphorus content in ferroaluminum, ferroaluminum manganese and ferrosilicon aluminum manganese. The measurement range (mass fraction) is 0.0050% ~ 0.050%.

Document data

International classification (ICS): 77.100.

Chinese classification (CCS): H11.

Estimated length of the Chinese original: 9,935 words.
