What this standard covers

This standard specifies the terms and definitions, grades, technical requirements, sample preparation, test methods, quality assessment procedures, packaging, marking, transport, storage and quality certificates for large surface composite prefabricated coke ovens. This standard is applicable to the large prefabricated parts of mullite-cordierite surface with low expansion microcrystalline ceramic glaze layer. It is also applicable to the same material non-surface composite large-scale prefabricated parts, mainly used for coke oven door, coal loading port and gas rising Pipes and other thermal equipment lining.

Document data

International classification (ICS): 81.080.

Chinese classification (CCS): Q46.

Estimated length of the Chinese original: 7,761 words.
