What this standard covers

This standard specifies the terms and definitions, grades, technical requirements, test specimen preparation, test methods, quality assessment procedures, packaging, marking, transport, storage and quality certificates for wear resistant refractory trowels. This standard applies to circulating fluidized bed boilers, waste heat power generation boilers, petrochemical catalytic cracking unit, waste incinerator, new dry cement kiln system, pulverized coal ash system and ash collection pipeline system and other thermal furnace, the use of temperature Apply at 1200°C the following parts of the construction of high-alumina or high-alumina silicon carbide wear resistant refractory coating.

Document data

International classification (ICS): 81.080.

Chinese classification (CCS): Q46.

Estimated length of the Chinese original: 6,634 words.
