What this standard covers

This Standard specifies the mechanical connection reinforced residual deformation test of terms and definitions, symbols and instructions, test principle, specimen, test equipment, test procedures and test reports. This Standard applies to room temperature mechanical connection reinforced to withstand static load after a predetermined amount of residual deformation measurements.

Document data

International classification (ICS): 77.040.10.

Chinese classification (CCS): H22.

Estimated length of the Chinese original: 8,874 words.
