What this standard covers

This standard specifies the determination of nitrogen by the inert gas fusible thermal conductivity method. This standard is applicable to the determination of nitrogen content in ferromanganese nitride. Measurement range (mass fraction): 2.00% ~ 9.00%.

Document data

International classification (ICS): 77.100.

Chinese classification (CCS): H11.

Estimated length of the Chinese original: 6,631 words.
