What this standard covers

This standard specifies the terms and definitions, technical requirements, interface requirements, test methods and quality certificates for ductile iron pipes and their interfaces for any type of casting process or assembly of cast iron components. This standard applies to: the use of different types of water transport; pressure or no pressure transmission. The standard size range for this standard is DN80 ~ DN2600. This standard does not include interface design and apron shape.

Document data

Chinese classification (CCS): H48.

Estimated length of the Chinese original: 21,290 words.

Adopted international standard: ISO 13470-2012, MOD.
