What this standard covers

This standard specifies the terms and definitions, classification and code, technical requirements, test methods, inspection rules, packaging, marking and quality certificates of anti-wear chromium-nickel-molybdenum-iron alloy composite guide plates for rolling. This standard is applicable to anti-wear chrome-nickel-molybdenum-iron-based alloy composite guide plates for rolling steel in metallurgical industry, and can also be used for plate-like parts with anti-wear characteristics under similar working conditions.

Document data

International classification (ICS): 77.100.

Chinese classification (CCS): H42.

Estimated length of the Chinese original: 8,896 words.
