What this standard covers

This standard specifies the definition and code, technical requirements, test methods, inspection rules, marking, packaging, transportation, storage and quality certificates of ultra-high thermal conductivity graphite blocks. This standard is applicable to petroleum coke, asphalt coke and coal tar pitch as main raw materials. It is formed by molding, roasting, impregnation, graphitization and mechanical finishing. It is mainly used in blast furnaces, submerged arc furnaces and other fields.

Document data

International classification (ICS): 59.100.20.

Chinese classification (CCS): Q51.

Estimated length of the Chinese original: 6,699 words.
