What this standard covers

This standard specifies the branding method, ordering content, size, shape, weight, technical requirements, test methods, inspection rules, packaging, marking and quality certificate of steel plates for high-speed train bogies. This standard is applicable to the manufacture of high-speed train bogies with improved atmospheric corrosion resistant steel plates (hereinafter referred to as steel plates) with a thickness of 6 mm to 80 mm. Steel plates for high-speed train body undercarriage can also be used as reference.

Document data

International classification (ICS): 77.140.50.

Chinese classification (CCS): H46.
