What this standard covers

This standard specifies the technical parameters and ecological environment restoration requirements for waste rock from open-pit to underground mines to be disposed of in the open-pit boundary. This standard is applicable to iron mines during the transition period from open-pit to underground. The internal discharge of waste rock from other types of mines can be implemented by reference.

Document data

International classification (ICS): 77.140.99.

Chinese classification (CCS): H34.
