What this standard covers

This standard specifies the terms and definitions, evaluation principles and methods, evaluation requirements, and life cycle evaluation report preparation methods for weather-resistant structural steel green design products. This standard is applicable to the green design products of steel plates, steel strips and steel shapes with atmospheric corrosion resistance for vehicles, bridges, containers, buildings, towers and other structures produced by blast furnace ironmaking, converter steelmaking, hot rolling and other processes. Evaluation.

Document data

International classification (ICS): 77-010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 15,121 words.
