What this standard covers

This standard specifies the terms and definitions, evaluation principles and methods, evaluation requirements, and life cycle evaluation report preparation methods for cold-rolled high-strength steel plates and steel strip green design products for automobiles. This standard applies to the green design product evaluation of cold-rolled high-strength steel plates and steel strips for automobiles produced by blast furnace ironmaking, converter steelmaking, hot continuous rolling mills, and cold continuous rolling mills.

Document data

International classification (ICS): 77-010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 16,192 words.
