What this standard covers

This standard specifies the terms and definitions, evaluation principles and methods, evaluation requirements, and life cycle evaluation report preparation methods for green design products of steel structures for bridges. This standard is applicable to the evaluation of green design products of structural steel plates, steel strips and steel shapes for bridges produced by processes such as blast furnace steelmaking, converter steelmaking, and hot rolling.

Document data

International classification (ICS): 77-010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 15,155 words.
