What this standard covers

This standard specifies the terms and definitions, technical requirements, boiler system, steam turbine system, water supply and drainage system, other systems, and system safety of by-product gas power generation technology for iron and steel enterprises. This standard applies to high temperature, high pressure and above parameters gas direct-fired boiler power generation technology, and does not apply to gas-steam combined cycle power generation technology.

Document data

International classification (ICS): 77-010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 5,561 words.
