### What this standard covers

This standard specifies the terms and definitions, technical principles, gas source requirements, sub-technical systems, process requirements and safety requirements for carbon dioxide used in molten steel refining. This document applies to the design, construction, operation and management of carbon dioxide utilization process technology in the molten steel refining process of steel enterprises.

### Document data

International classification (ICS): 77.010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 7,718 words.
