What this standard covers

This standard specifies the 1, 8 naphthalene dicarboxylic anhydride melting point of the test principle, and preparation of samples, instruments and materials, test procedures, test results and precision. This standard applies to high temperature coal tar is separated from industrial acenaphthene, obtained by oxidation of 1, 8 naphthalene dicarboxylic anhydride melting point determination.

Document data

International classification (ICS): 71.080.50.

Chinese classification (CCS): G18.

Estimated length of the Chinese original: 4,421 words.

Supersedes the earlier edition YB/T 5098-1993.
