### What this standard covers

This standard specifies the principle, sample requirements, test equipment, test conditions and procedures, and test results of the method for determining the continuous cooling transition curve of steel. This standard is applicable to the static or dynamic continuous cooling transition curve of steel by the method of expansion, metallographic method and hardness method.

### Document data

International classification (ICS): 77.040.99.

Chinese classification (CCS): H21.

Estimated length of the Chinese original: 12,194 words.

Supersedes the earlier edition YB/T 5128-1993.
