What this standard covers

This standard specifies the principle, reagents and materials, instruments and equipment, sample preparation, calibration curve, analysis procedure, calculation of results, precision and test report for the determination of silicon content in high purity graphite products by silicon-molybdenum blue spectrophotometry.

Document data

International classification (ICS): 59.100.01.

Chinese classification (CCS): Q51.

Estimated length of the Chinese original: 5,535 words.

Supersedes the earlier edition YB/T 5156-1993.
