What this standard covers

This standard specifies the cathode block electrolytic test methods, principles, equipment, samples, test procedures, the results calculated. This standard applies to charcoal analog electrolysis "technology test" to determine the carbon block resistant to breakage performance.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 7,774 words.

Supersedes the earlier edition YB/T 5160-1993.
