What this standard covers

This standard specifies the principle, experimental equipment, experimental procedures, calculation of results, and precision of asphaltene content determination of feedstock oil for carbon black (including coking feedstock oil for carbon black and ethylene tar obtained by petroleum cracking).

Document data

Chinese classification (CCS): G18.

Estimated length of the Chinese original: 5,533 words.

Supersedes the earlier edition YB/T 5178-1993.
