What this standard covers

This standard specifies the anti-oxidation coating graphite electrodes scope, classifications, dimensions and tolerances, technical requirements, test methods, inspection rules, packaging marking and quality certification, etc. This standard applies to graphite electrodes as the substrate, in its trunk oxidation resistant coating surface coating made of coated electrodes for electric arc furnace as a conductive material is resistant to oxidation coating graphite electrode.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 5,588 words.

Supersedes the earlier edition YB/T 5214-1993.
