What this standard covers

This standard specifies the reagents, instruments and equipment, sample preparation, test preparation, test procedure, result calculation, test error and test report for corrosion resistance test of carbon materials. This standard applies to the determination of the corrosion resistance of carbon materials as anodes in the process of smelting metals and non-metals by electrolysis.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q51.

Estimated length of the Chinese original: 9,918 words.

Supersedes the earlier edition YB/T 5288-1999.
