What this standard covers

This standard specifies the load tensile stainless steel, U- bend test specimen preparation under the conditions and requirements of the test solution, test instruments and equipment, test conditions and procedures and test reports. This standard applies to evaluation of stainless steel in a boiling solution of magnesium chloride stress corrosion susceptibility.

Document data

International classification (ICS): 77.060.

Chinese classification (CCS): H25.

Estimated length of the Chinese original: 6,698 words.

Adopted international standard: JIS G0576-1975, NEQ.

Supersedes the earlier edition GB/T 17898-1999.
