What this standard covers

This standard specifies the terms and definitions, principles, test and calculation benchmarks, main parameters and production conditions, test preparation, test requirements, test procedures, calculation methods, test result analysis, and test reports for sintered material surface air volume testing. This standard is applicable to the test and calculation of the material surface air volume of the sintering machine system in the iron and steel industry.

Document data

International classification (ICS): 77.010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 11,172 words.
