What this standard covers

This standard specifies the equipment for the thermal expansion coefficient of isostatic graphite, sample requirements, test procedures, result calculations, tolerances and test reports. This standard is applicable to the determination of the linear thermal expansion coefficient of isostatic graphite with a push rod type thermal dilatometer, and other carbon materials are used as a reference.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 7,782 words.
