What this standard covers

This standard specifies the technical requirements, test methods, inspection rules, packaging, marking and quality certificates, transportation and storage of borate-impregnated oxidation-resistant graphite electrodes. This standard applies to anti-oxidation graphite electrodes that are made of mechanically processed graphite electrodes as substrates and impregnated with borate, and used as conductive materials for power arc furnaces.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 5,534 words.
