What this standard covers

This standard specifies the instruments and equipment, samples, test procedures, calculation methods, tolerances, and test reports for the method of measuring the compressive strength index of needle coke. This standard is applicable to the determination of the compressive strength index of coal-based needle coke mesocoke, coal-based needle coke, oil-based needle coke and other granular materials with no fixed shape.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 6,623 words.
