What this standard covers

This standard specifies the terms and definitions, technical requirements, statistical scope and calculation methods, energy conservation management and measures for the energy consumption limit of stainless steel smelting unit products in the refining process. This document is applicable to the energy consumption calculation and assessment of stainless steel production in the refining process of iron and steel enterprises, as well as the energy consumption control of new (renovation and expansion) projects.

Document data

International classification (ICS): 77.010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 8,895 words.
