What this standard covers

This standard specifies the sample and sample preparation, measurement method and test report for the determination of intergranular oxidation depth of steel. This standard is applicable to the determination of the intergranular oxidation depth of the surface layer of steel. Other metals and alloys may be used as reference.

Document data

International classification (ICS): 77.040.99.

Chinese classification (CCS): H24.

Estimated length of the Chinese original: 10,167 words.
