What this standard covers

This standard specifies the principles, general requirements, comparison samples, testing equipment, testing procedures, result evaluation and testing reports for rail eddy current testing. This standard is applicable to eddy current testing of rails with symmetrical and asymmetrical sections between 43kg/m and 75kg/m. Eddy current testing of other rails can also be implemented with reference.

Document data

International classification (ICS): 77.040.20.

Chinese classification (CCS): H26.

Estimated length of the Chinese original: 11,155 words.
