What this standard covers

This standard specifies the grade, ordering content, size, shape, weight and allowable deviations, technical requirements, test methods, inspection rules, packaging, marking and quality certificates of coated refractory and weather-resistant hot-rolled steel plates and steel strips. This standard applies to hot-rolled wide steel strips, continuous-rolled steel plates and slit steel strips with a thickness not greater than 25.4mm and a width not less than 600mm. They are usually used to manufacture buildings, bridges, fire doors, etc. that require atmospheric corrosion resistance and fire resistance. Scaffolding etc. This standard is applicable to coating applications that require corrosion resistance and fire resistance under atmospheric corrosion levels C1 to C4.

Document data

International classification (ICS): 77.140.50.

Chinese classification (CCS): H46.
