What this standard covers

This standard specifies the method principle, instruments and reagents, test environment, sample preparation, analysis steps and test report for the qualitative analysis of functional groups of graphene oxide powder by Fourier transform infrared spectroscopy. This standard is applicable to the qualitative analysis of functional groups of graphene oxide powder by Fourier transform infrared spectroscopy. The qualitative analysis of reduced graphene oxide and graphite oxide powder can refer to this standard.

Document data

International classification (ICS): 77.040.20.

Chinese classification (CCS): Q53.

Estimated length of the Chinese original: 12,183 words.
