What this standard covers

This standard specifies the analysis of manganese, nickel, chromium, molybdenum, copper, and titanium content in scrap steel by handheld energy dispersive X-ray fluorescence spectrometer. This standard applies to on-site material review of the manganese, nickel, chromium, molybdenum, copper, and titanium elements in scrap steel.

Document data

International classification (ICS): 77.100.

Chinese classification (CCS): H11.

Estimated length of the Chinese original: 7,780 words.
