What this standard covers

This standard specifies the sample preparation, defect characteristics, causes, evaluation principles, evaluation methods and inspection reports for the metallographic evaluation of square segregation of medium carbon steel wire rods. This standard applies to the square segregation evaluation of medium carbon steel wire rods with a carbon content of 0.25% to 0.6% and a specification diameter of 5mm to 30mm. Wire rods with other carbon contents and specifications can be evaluated as a reference.

Document data

International classification (ICS): 77.040.99.

Chinese classification (CCS): H24.
