What this standard covers

This standard specifies the brand representation method, ordering content, dimensions, shape, weight and allowable deviation, technical requirements, test methods, inspection rules, packaging, marking and quality certificates of hot-rolled H-shaped steel for buckling restraint support. This standard is applicable to the manufacture of low yield strength hot-rolled H-shaped steel for energy-consuming structural parts such as earthquake resistance and shock absorption of buildings.

Document data

International classification (ICS): 77.140.60.

Chinese classification (CCS): H44.

Estimated length of the Chinese original: 9,958 words.
