What this standard covers

This standard specifies the basic property test methods for determining the assimilability, liquid phase fluidity, continuous crystal strength, bonding phase strength and calcium ferrite generation performance of iron ore sintering. This standard is applicable to the determination of basic properties of iron ore sintering for blast furnace ironmaking.

Document data

International classification (ICS): 73.060.10.

Chinese classification (CCS): D31.

Estimated length of the Chinese original: 10,169 words.
