What this standard covers

This standard specifies the method for determining the nitrogen content in carbon enhancers such as coal-based carbon enhancers, petroleum coke carbon enhancers, and asphalt coke carbon enhancers by the formaldehyde method. This standard is applicable to the determination of nitrogen content in carbon enhancers, and the measurement range (mass fraction) is 0.20% to 4.0%.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q52.
