What this standard covers

This standard specifies the spectrophotometric determination method, principle, and test conditions for the content of elemental silicon and silicon dioxide in silicon-carbon composite negative electrode materials. This standard applies to silicon-carbon composite negative electrode materials for lithium-ion batteries.

Document data

International classification (ICS): 59.100.20.

Chinese classification (CCS): Q53.

Estimated length of the Chinese original: 8,864 words.
