What this standard covers

This standard specifies the principle of the performance determination method for the transverse shear strength, longitudinal shear strength and compressive strength of rammed coal cake samples of coking coal, the collection and preparation of samples, instruments and materials, test procedures, calculation and precision of test results, etc. This standard is applicable to the determination of the ramming performance of coking coal.

Document data

International classification (ICS): 75.160.10.

Chinese classification (CCS): H32.

Estimated length of the Chinese original: 14,196 words.
